

Sample survey to gather information to advocate to the Governing body (Ministry/Council/Commission) or Clinicians/Professional Organizations

File description: one downloadable file with the instructions and sample survey

When to use: survey practicing clinicians or clinical education placement sites to explore how prepared are recent graduates to provide appropriate wheelchair services.

There are free survey tools that you can use such as Survey Monkey or Google Forms.

1. Describe the name of your service [optional, open-ended question]
2. What percentage of the users/patients that your service sees are wheelchair users? [required, open-ended question]
3. Please select which of the following steps are conducted in your service (select all that apply): [required, multiple choice question with multiple answers]
 - a. Refer users to wheelchair services
 - b. Conduct wheelchair evaluation of users/patients
 - c. Prescribe a wheelchair according to the user/patient's needs
 - d. Submit/process for wheelchair funding or order a wheelchair
 - e. Prepare a wheelchair to be delivered (includes fabrication, assembly)
 - f. Conduct the fitting of the new wheelchair to the user's needs
 - g. Train the user on how to use the wheelchair, mobility skills, maintenance
 - h. Conduct follow up, verify that the wheelchair is meeting the user's needs and if not, refer them to the appropriate services that they need
 - i. None of the above
4. Please describe how prepared are recent rehabilitation graduates to respond to the steps a-h listed in the previous question: [required, open-ended question]
5. In your experience, what do [*insert profession*] need to know about wheelchairs, their provision, and their use? [required, open-ended question]
